

## Portavo 902 pH

The basic version for mobile pH measurement.

Robust, intuitive portable device for routine daily measurements in laboratories and processes. Over 1,000 operating hours with a single set of batteries (4x AA).

### Facts

- A sensor quiver protects the sensor from drying out or being damaged in daily use.
- The high-performance polymer housing ensures low water consumption and high impact resistance
- Over 1,000 hours of measurement with a single set of batteries (4x AA)
- Memosens sensors and pH sensors can be used on one device (e.g special flat-membrane sensors)
- The mineral glass display is perfectly readable even after years
